

COMPLIANCE WITH ENVIRONMENTAL MANDATORY SCHEMES ARE TOO IMPORTANT TO LEAVE TO CHANCE

With the growing regulatory focus on environmental risks and opportunities globally, our experts at LTM will ensure your organisation improves its sustainability profile by maintaining legitimacy, reducing financial and reputational risk, improving your utility efficiency and enhancing your brand as a good corporate citizen – ensuring that your organization benefits all round from sustainable business value.

Greenhouse Gas reporting to Department of Environmental, Forestry and Fisheries - Due 31 March
Carbon Tax to South African Revenue Services - Due 31 October
(The penalty for non-compliance to the legislations are fines of R5m or 5-year imprisonment)

LTM has a one-stop process to understand your organisations compliance requirements, analyse your data, assist with the submission to relevant regulators and assist you to maximise savings across your portfolio. Our enhanced Smart Utility Management Software (**eSUMS**) reduces time, effort and human error. Let our experience, technical skills, international award-winning track record and excellent relationships assist you with compliance reporting and sustainability ambitions.

Zero Cost:
Analyse your business against legal requirements

Understand utility consumption data

Convert data into environmental emissions

Report GHG emissions on-line to DEFF

Calculate Carbon Tax liability

Report Carbon Tax on-line to SARS

Determine opportunities for organisation
